PREFACE.

This edition of The Alumni Catalogue follows closely the plan of the edition of 1911. It aims to present in Part I, the names of all Officers of the University from the organization of the first Board of Regents in 1837 to December 31, 1921; in Part II, the names of all graduates of the University down to the same date; in Part III, the names of all former students, who have not taken their degrees here, exclusive of those registered in the academic sessions of 1921-1922 and 1922-1923. (However, the Necrology Records of the non-graduates have been brought down to the date of publication.)

Part I has been divided into appropriate groups, and each group, with the exception of the Faculty, has been arranged in chronological order according to date of original appointment or election. For the sake of convenience in editing and consulting such a large list, the group entitled "Members of the Faculties" has been arranged in alphabetical order. Included in this list are the names of those administrative officers who are not grouped separately elsewhere, and certain other officers whose full records do not follow their names in the groups. In the case of each former Faculty member who is no longer connected with the University, present address and occupation, or place and date of death, follow the statement of titles and periods of service at this University. In a few instances, this information concerning former faculty members could not be ascertained.

Part II is arranged alphabetically by Classes under each College or School of the University. In the case of the College or School which conferred advanced degrees previous to but not after 1913, for graduate study, the lists of such graduates will be found following the class lists of that College or School. Provision for a new section in this book has been made necessary by the organization of the Graduate School in 1912. In this section, which follows the class lists, will be found the advanced degrees conferred since 1912 by all the Colleges and Schools, with the exception of those conferred by the Law School. A list of Honorary Degrees, also arranged by years, follows this section.

Part III has been arranged under one alphabet rather than by Colleges, Schools, and Classes, for the obvious reason that no precise arrangement of that kind was possible. In the Literary College a large part of these non-graduates entered as special students and never became identified with any Class. Others were members of different Classes, or of different Colleges or Schools, at different times. In the Professional Schools the same is true in a lesser degree.

In Parts II and III, an attempt has been made to record addresses and occupations of the living, and dates and places of death of the deceased. In case of the Professional Colleges and Schools, it has been assumed that persons are following the occupations indicated by their professional degrees, unless otherwise recorded. Where a graduate appears in more than one list, any subsequent recurrence of the name after the first entry, is followed only by a back reference (the previous degree with date), and by the address when known. However, if the person is deceased, an asterisk precedes the name, the back reference follows the name, and the necrology record is omitted.

Special care has been taken to record, with dates, academic degrees received elsewhere by our alumni. With reference to academic and other official positions, the Editor has been much perplexed in drawing the line of selection. County and municipal offices (excepting judgeships), postmasterships, membership in State legislatures and on boards of control, membership in learned societies, etc., have been generally omitted. To have made record of all these would have added many hundreds of items and would have swelled the volume to undue proportions.

The necessity of making room for nearly 18,000 new names in this edition has required the condensation of the records. This applies especially to the military records, and to the biographical and obituary data.

The obituary and residence records are as complete as they could be made, but many blanks are still unfilled. A considerable number of the older "Unknowns," for whom no information is available owing to imperfect registration, are doubtless deceased. It is not likely that these records can ever be completed.

The Editor has proceeded on the principle of excluding all conjecture, no matter how plausible, when known to be conjecture. Much information, more or less probable, but still lacking confirmation, has been received, but not used. No doubt, some matters here recorded, rested more or less on conjecture in the minds of those reporting them; but all possible diligence has been exercised by the Editor in checking error. Official records have been constantly referred to, whenever accessible.

No small difficulty has been encountered in making up the list of non-graduates. The lists of graduates aggregate 36,400 names, while the non-graduates total 25,166 names. In so large a roster, so many identical or similar names appear in the same College or School or in different Colleges or Schools, that the difficulty of determining the identity or non-identity of persons represented has often been very great. But these lists may be taken as a substantially complete roster of all persons who have matriculated at this University in the years covered by this record.

Doubtless, this book contains many errors. Only the person who has had to do with such a publication, can fully appreciate the many sources of error. The Editor of an Alumni Directory of a nearby State University estimated the errors in that book at a maximum of ten million. With fully twice as many names in our own publication, we do not even venture to estimate the number of mistakes. Extended checking and re-checking would, no doubt, eliminate many of these errors. But this would entail unjustified expense. The Editor has estimated that a careful re-checking of all the names in this book would require the full time of one person for six years. Much information is missing from the book because many former students have failed to reply to our various requests for data concerning themselves. The Editor earnestly desires that every person who detects an error or an omission will notify the Alumni Catalogue Office. In this way only, can these errors be eliminated from subsequent editions.

The Editor would be extremely lacking in appreciation and gratitude were he to fail to express at this point, the profound sense of his obligation to the late Professor Isaac Newton Demmon, A.B. '68, A.M. '71, who during forty-five years of teaching in the University, gave liberally of his time, strength, diligence, and skill to the task of perfecting the official records of the University. And the Editor desires to say that in the publication of this volume, he would have been confronted with insurmountable difficulties had he not had as a foundation, the corrected records left by his predecessor.

Ann Arbor, Michigan, 1923.

How to Use the Directory

The following notes explain the characters and abbreviations used and the arrangement of the various divisions of the book.

OFFICERS

Part I. Pages 3-5

The lists of Regents, Secretaries, Treasurers, Librarians, Superintendents of Public Instruction, and Presidents being comparatively small, any name may be found in its proper group without the aid of an alphabetical index.

FACULTY

Part I. Pages 5-51

The size of the Faculty list has made necessary an alphabetical arrangement in this Edition. Following each name is an official record to date. An explanation relative to the military records of Faculty Members and Administrative Officers will be found as a footnote on the first page of the Faculty list.

GRADUATES

Part II. Pages 55-

The graduates are arranged according to three schemes. (a) Colleges and Schools are ordered according to priority of establishment at the University; *viz.*, Literary, Engineering, Medical, Law, Pharmacy, Homoeopathic, Dental, and Graduate. (b) Classes are arranged in chronological order within the Colleges and Schools. (c) Names appear in alphabetical order within the classes.

In the cases of the Colleges or Schools granting more than one degree, the particular degrees granted graduates follow the names. In the cases of the Colleges or Schools granting only one degree, no degrees appear after the names.

NON-GRADUATES

Part III. Pages

The non-graduates appear in one alphabetical list. Letters and figures following the names indicate the Colleges or Schools attended and the years of attendance.

Following this list is a list of non-graduate women who have married or otherwise changed their names since matriculating at the University. These are arranged in an alphabetical order of married or new names, the maiden or former name following in each case.

INDEX OF GRADUATES

Pages

The last portion of the book is an index of the graduates. To find the record of any graduate consult the index. Note that following each name are a letter indicating the College or School from which the person was graduated, and a figure indicating the class year. By means of these two keys any name may be found in the proper class

list. The letters following the names have the following significance; a, College of Literature, Science, and the Arts; e, Colleges of Engineering and Architecture; m, Medical School; l, Law School; p, Pharmacy College; h, Homoeopathic Medical School; d, Dental College; g, Graduate School; and hon., Honorary. The combinations ag, eg, and the like refer to advanced degrees following the Literary lists, Engineering lists, etc. Each woman graduate whose name is now known to be different from the name under which she graduated (e. g. a change of name through marriage, through the adoption of a religious name, etc.) is listed in the index under both maiden or former name and married or new name. In the class lists she is alphabetized under her maiden or former name, the married or new name following.

MILITARY RECORDS

Service in the various wars is indicated as follows:

- θ—Mexican War
- †—Civil War
- §—Spanish-American War
- ϕ—Mexican Border Service
- ‡—European War

Doubtless many who served in the European War are not credited with such service in this volume. These omissions have been caused by failure on the part of a large number of Alumni to reply to any of the three circulars sent out. It is expected that a special Military Record book will be published by the University in the near future. Before this proposed volume is published every effort will be made to secure complete records from all who served.

Due to the lack of space, the Military Records are very much condensed and abbreviated. The general rule has been to record only the years covering the entire period of service and the latest rank authentically reported.

NECROLOGY RECORDS

To names of persons known to be deceased an asterisk (*) is prefixed. Following the name of each deceased person is a record of the place and date of death. Where there is no record except the asterisk it is to be understood that, although it is certain the person is dead, exact data could not be secured. However, as has been explained in the preface, if a person's name occurs in more than one class list, the necrology record follows the name where it first appears, and only the asterisk accompanies the name where it occurs in subsequent lists.

ADDRESS RECORDS

Absence of an address following a name indicates that the person's address is not known. Information concerning such "unknown" Alumni is earnestly requested and will be most gratefully received.

Officers of the University

I. REGENTS

Under the Acts of March 18 and June 21, 1837, the Board was originally made up of eighteen members, six *ex-officio*, and twelve by appointment of the Governor, with the advice and consent of the Senate. Of the twelve Regents named by Governor Mason, March 21, 1837, three were to hold office for one year, three for two years, three for three years, and three for four years; thereafter, the term was four years. In 1838 an additional Justice of the Supreme Court was authorized, which increased the number to nineteen; but in 1847 the office of Chancellor of State was abolished, thus reducing the total to eighteen again. The Governor was President of the Board; in his absence, the Lieutenant-Governor. In case of the absence of both, a President *pro tempore* was chosen by the Board. These conditions held till January 1, 1852, when a new Board chosen under the Constitution of 1850 took office.

The Constitution of 1850 provided that the Regents should be elected by the people voting at the April election of 1851, on the same ticket with the Circuit and Supreme Courts, one Regent to be chosen from each Judicial Circuit, to hold office for six years from January 1 following the election. In case of death or resignation the vacancy was filled by popular election. In practice, vacancies were not promptly filled; sometimes not at all. The first Board chosen under this arrangement took office January 1, 1852, and consisted of eight members. Six years later the number was increased to ten.

In 1861 the Constitution was amended so as to provide for a Board of eight Regents to be chosen on a general ticket at the April election of 1863 and to take office January 1 following. These were to be divided into four classes to serve two, four, six, and eight years respectively. Thereafter, two were to be elected every second year, at the April election, for the full term of eight years. In case of vacancy from any cause the Governor was to appoint. This arrangement still continues.

In all, one hundred and forty-three persons have borne the title. Of the entire number, nineteen have served for ten years or more. The longest period was eighteen years (Edward Carey Walker, 1864-1882) and the next longest was seventeen years (Elon Farnsworth, 1837-1842, 1846-1858 and Walter Hume Sawyer, now a member of the Board, 1906-1923). Two served sixteen years (Roger Williams Butterfield, 1888-1904 and Frank Ward Fletcher, 1894-1910). Two other members of the present Board have served fifteen years (Junius Emery Beal and Frank Bruce Leland, 1908-1923).

- *CLEVELAND ABBE, A.B., Instructor in Physics and Civil Engineering, 1859-1860; Professor of Meteorology in George Washington University, 1884-1909; Lecturer on Meteorology in Johns Hopkins University; Professor of Meteorology, U. S. Weather Bureau. Died at Chevy Chase, Md., October 28, 1916.
- †WALDO M. ABBOTT, A.B., LL.D., Instructor in Rhetoric, 1920—.
- †HERBERT LESTER ABBOTT, B.S., Instructor in Descriptive Geometry and Drawing, 1908-1915;

¹Included in this list are the names of those Administrative officers who are not grouped separately elsewhere and certain other officers whose full records do not follow their names in the groups.

Military service is indicated and recorded in this list according to the following scheme. Appropriate characters preceding the names indicate service in particular wars. Following each name thus marked is a condensed record of military service, provided the person is not an Alumnus. If, however, the person is an Alumnus, only the military character accompanies the name, the military record being found with the name in its place in the Alumni lists.

¹The Department of Engineering (changed to Department of Engineering and Architecture in 1913 and to Colleges of Engineering and Architecture in 1915) was organized as a separate Department of the University in 1895. Prior to that date, the courses leading to the various degrees in Engineering were given in the Department of Literature, Science, and the Arts.

Beginning with 1882 the degree of Engineer has been given only as an advanced degree.

The names of graduates of this University and of other institutions who have taken advanced degrees in the Colleges of Engineering and Architecture prior to 1913 are included in a special list of Graduate Students following the Class of 1921.

Since 1913, advanced work in Engineering and Architecture has been done in the Graduate School.
